TRADE FROM THE BROWSER

*A FOREX AND CRYPTO TRADING APP BUILT AS A **PWA**: IT INSTALLS FROM THE BROWSER, NO APP STORE.*

*I DESIGNED IT END TO END: **LOGIN, MARKETS, DEAL TICKET, PORTFOLIO, WEB VIEW**.*

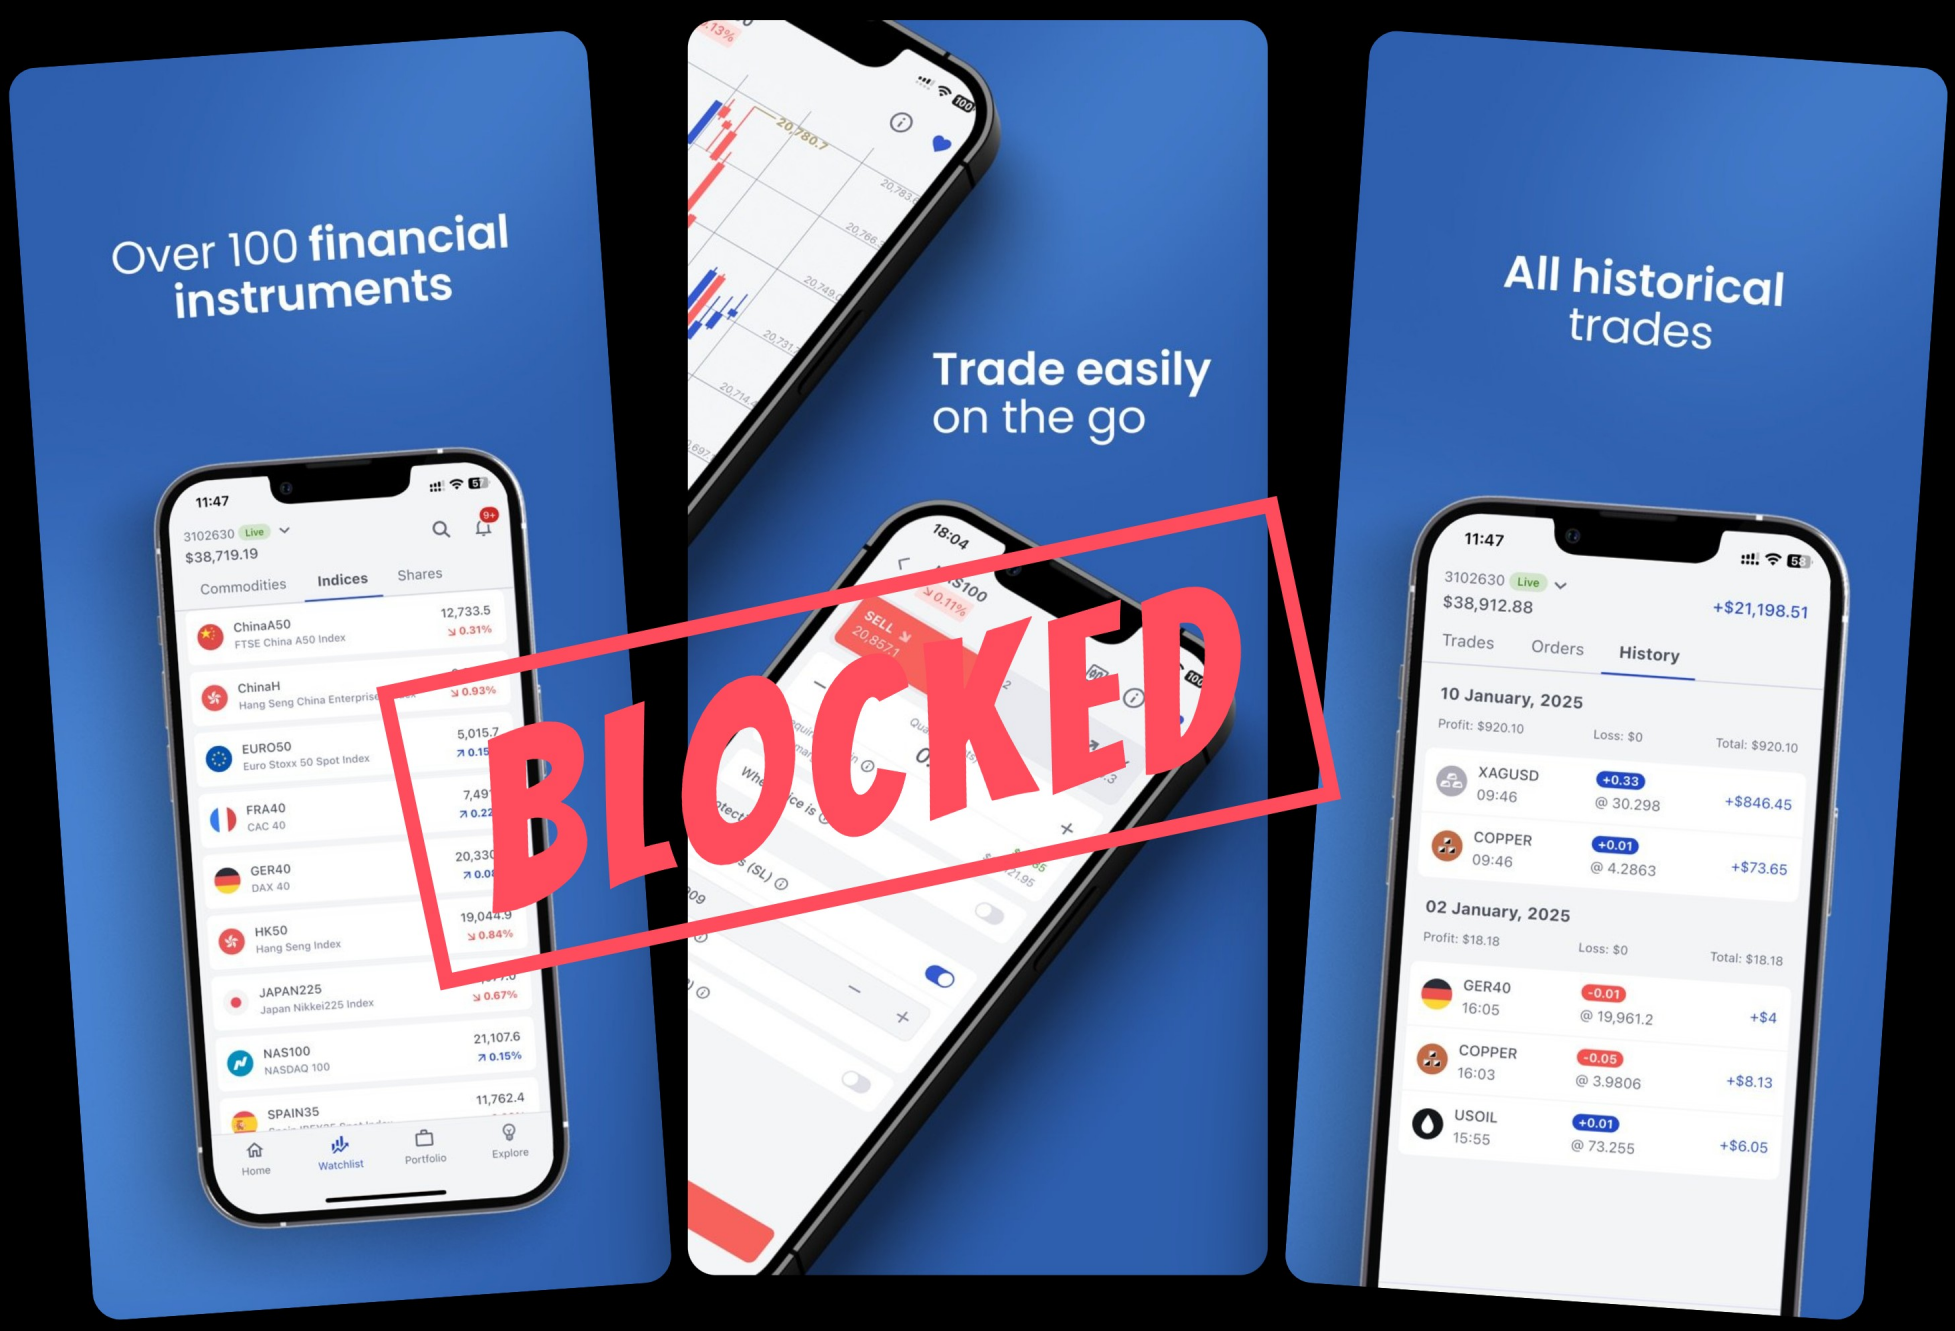

*ONE DARK PURPLE SYSTEM FOR **PHONE AND DESKTOP**.*

SCREENS: MY PWA APP FILE IN FIGMA

THE MAIN APP WAS STUCK

BEFORE: THE OLD BLUE ZFX APP (ZEAL TRADER, APP STORE)

WHAT HELD ZEAL BACK

STORE REVIEWS FOR A TRADING APP: ***EVERY RELEASE WAITED DAYS****, SOMETIMES CAME BACK REJECTED.*

FOREX AND CFD RULES DIFFER BY COUNTRY: IN SOME REGIONS ***THE APP WAS NOT AVAILABLE AT ALL****.*

A HOTFIX FOR A BROKEN DEPOSIT FLOW ***COULD NOT SHIP TODAY****.*

NATIVE IOS AND ANDROID PLUS WEB: ***THREE CODEBASES****. MEANWHILE TRADERS* ***OPENED A COMPETITOR IN THE BROWSER****.*

THE PRODUCT WAS FINE.
DELIVERY WAS THE PROBLEM.

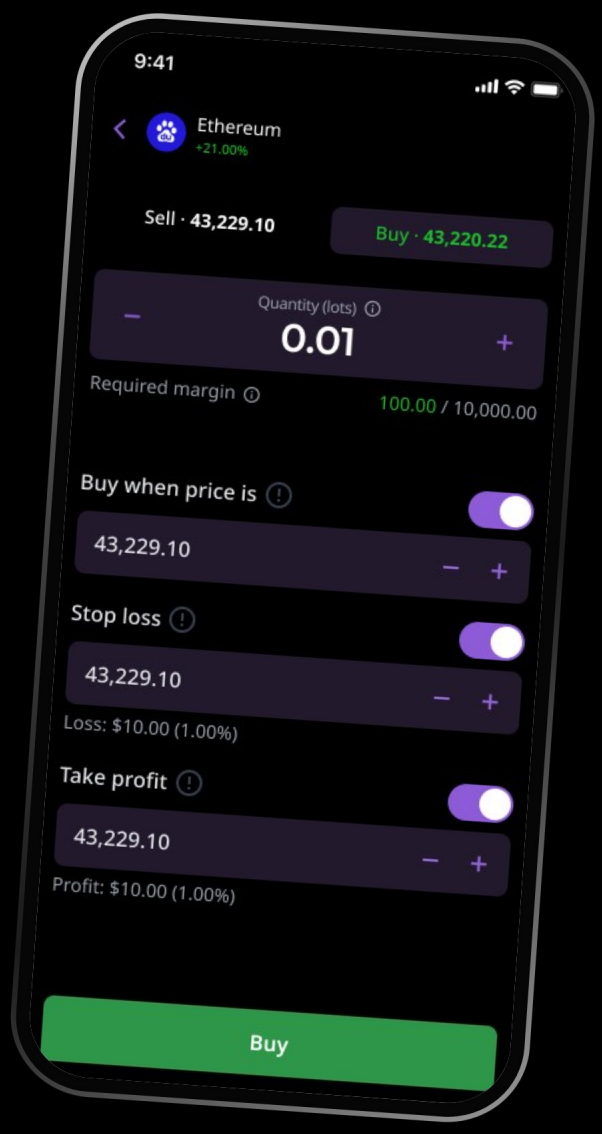

THE DECISION

IMPROVE THE CORE, SHIP IT ON THE WEB FIRST

1	**FIX THE CORE FLOWS**	*LOGIN, DEPOSIT, DEAL TICKET, PORTFOLIO: REWORK WHAT TRADERS USE EVERY DAY*
2	**SHIP AS A PWA**	*INSTALLS FROM THE BROWSER, NO STORE REVIEW, RELEASES THE SAME DAY, ONE CODEBASE FOR PHONE AND DESKTOP*
3	**LEARN FAST**	*WATCH REAL TRADERS, FIX ISSUES WEEKLY, KEEP WHAT WORKS*
4	**THEN THE SUPER APP**	*MOVE THE PROVEN FLOWS AND THE DESIGN SYSTEM INTO THE MAIN ZEAL APP*

*NOT A REWRITE OF EVERYTHING. **A SMALLER, FASTER PRODUCT** TO PROVE THE NEW UX.*

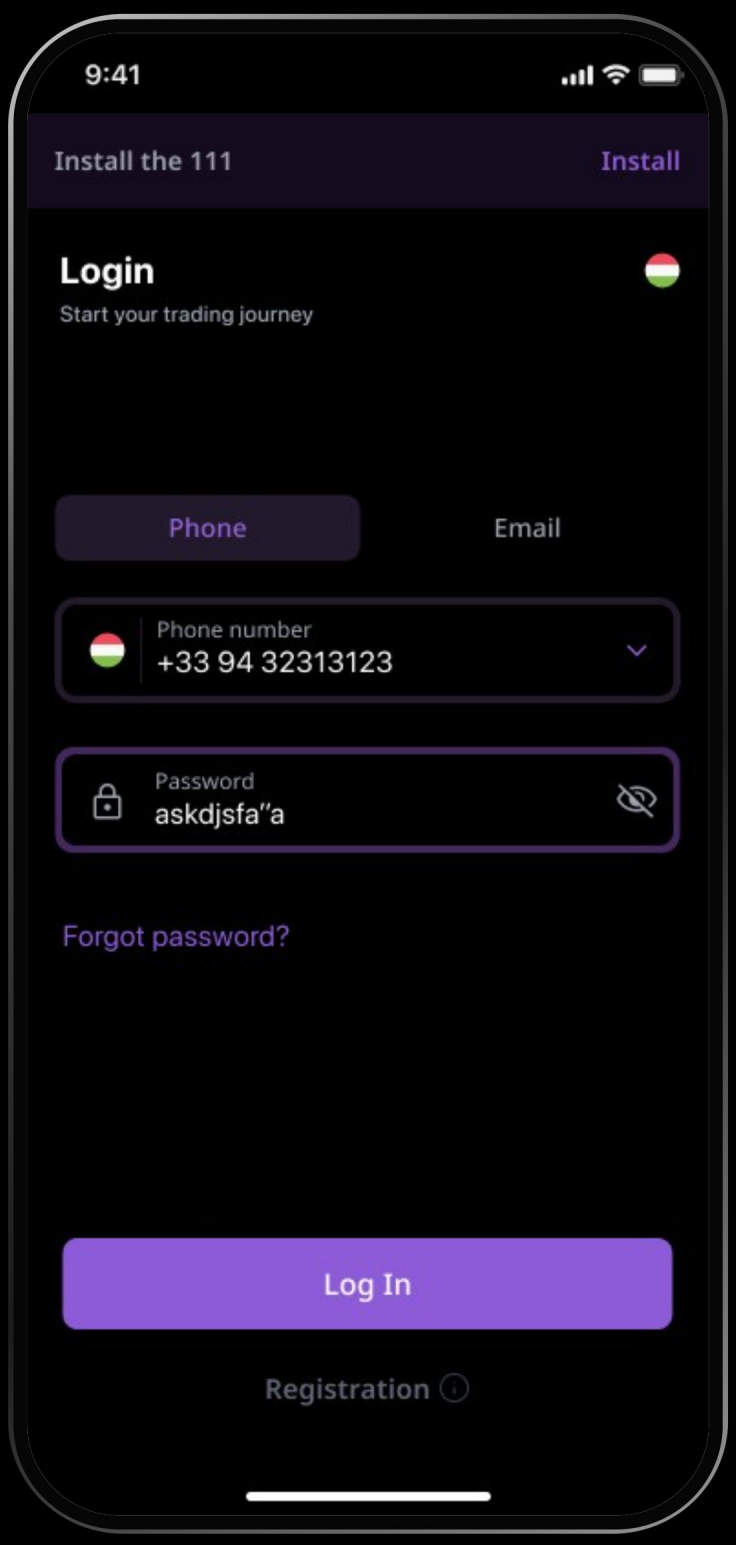

*THE PWA BECAME **THE TESTING GROUND** FOR THE WHOLE ZEAL ECOSYSTEM.*

*WEB FIRST, **STORE LATER**.*

NO STORE. JUST INSTALL.
